EMPLOYMENT	School of Accounting and Finance, The Hong Kong Polytechnic University, Hong SAR, China	g Kong	
	2023 – 2024 Postdoctoral Fellow		
EDUCATION	Department of Finance, Chinese University of Hong Kong, Hong Kong SAR, China	l	
	2018 – 2023 Ph.D. in Finance		
	Department of Mathematics, Nanjing University, Nanjing, China 2014 – 2017 M.Sc. in Probability and Mathematical Statistics 2010 – 2014 B.Sc. in Statistics		
Areas of Interests	Research: Fixed Income, Financial Intermediaries, Climate Finance, Textual Analysis Teaching: Investments, Fixed Income, Financial Markets, Sustainable Finance		
RESEARCH PAPERS	1. Idiosyncratic Bond Volatility and Funding Liquidity (with Jie Cao, and Tarun Chordia)		
	2. Carbon Emissions, Mutual Fund Trading, and the Liquidity of Corporate Bonds (with Jie Cao, Yi Li, Xintong Zhan, and Weiming Zhang)		
	3. Do Insurers Listen to Earnings Conference Calls? Evidence from the Corporate Bond Market (with Jie Cao, Gang Li, Russell Wermers, and Xintong Zhan)		
	4. Do Bond Short Sellers React to Earnings Conference Calls?		
TEACHING EXPERIENCE	Teaching Assistant, CUHK Business School, The Chinese University of Hong Kong - Financial Management (Undergraduate), 2020 - 2023 - Empirical Asset Pricing (PhD), 2021 - Current Topics in Finance (MBA), 2019 - 2020 - Fundamentals of Business Finance (Undergraduate), 2018 - 2019		
Presentations	Selected Presentations (# online,* by coauthor)		
AND DISCUSSIONS	\bullet American Finance Association Annual Meeting, Texas, US *	2024	
	\bullet The 10^{th} SAFE Asset Pricing Workshop, Frankfurt, Germany *	2023	
	• FIRN Asset Management Meeting, Brisbane, Australia *	2023	
	 XJTLU AI and Big Data in Accounting and Finance, Suzhou, China China Fintech Research Conference, Chengdu, China 	2023 2023	
	• FMA Annual Meeting, Atlanta, US #	2023	
	• Mordant Risk Society (MRS) PhD Seminar #	2022	
	• Midwest Finance Association Meetings (MFA), Chicago, US *	2022	
	• Financial Markets and Corporate Governance Conference (FMCG), Melbourne, Australia	# 2022	
	\bullet The 4^{th} Xiamen University Finance Engineering & Quantitative Finance Workshop, China	# 2022	
	• Shanghai-Edinburgh-London Green Finance Conference, Shanghai, China #	2022	
	• Finance and Accounting Annual Research Symposium (FARS), London, UK #	2022	
	 The 4th Israel Behavioral Finance Conference, Tel Aviv-Yaffo, Israel #* China International Risk Forum (CIRF), Dalian, China # 	2022 2022	
	• FMA European Conference, Lyon, France #	2022

1. Idiosyncratic Bond Volatility and Funding Liquidity

(with Jie Cao, and Tarun Chordia)

A positive cross-sectional relation between returns and lagged idiosyncratic volatility (IVOL) obtains in the corporate bond market because dealers are less willing to accept high IVOL bonds into inventory during low funding liquidity periods and the subsequent relaxation of this constraint causes an increase in prices. An exogenous shock to funding liquidity due to the Volcker rule (which limited the provision of liquidity by corporate bond dealers) drives the identification. Both, the time-series shock to the supply of funding liquidity and the cross-sectional variations in the demand for funding liquidity following the Volcker rule, impact the bond IVOL-return relation.

2. Carbon Emissions, Mutual Fund Trading, and the Liquidity of Corporate Bonds (with Jie Cao, Yi Li, Xintong Zhan, and Weiming Zhang)

This paper investigates how climate-related risks affect the trading behavior of bond mutual funds and tests the underlying mechanisms. We find that mutual funds collectively sell corporate bonds issued by firms with high carbon emissions, driven by funds' concerns about carbon-related redemption risks, rather than by a permanent shift in funds' investing preferences. Higher carbon exposures in mutual fund portfolios lead to more investor outflows, and bonds tend to experience more intensive selling if their holding mutual funds have higher flow-to-carbon sensitivity. Bonds issued by highcarbon firms experience worse liquidity conditions, especially when concerns about carbon-related risks heighten.

3. Do Insurers Listen to Earnings Conference Calls? Evidence from the Corporate Bond Market

(with Jie Cao, Gang Li, Russell Wermers, and Xintong Zhan)

We find that insurance companies decrease their holdings of a bond if the tone of the bond issuer's earnings conference call is more negative. The net negative tone of conference calls significantly predicts the issuer's default risk, which is a central concern for insurance companies. By creating a novel default-related dictionary, we further confirm that insurance companies react to the tone related to default information in conference calls. Bonds issued by firms with more negative conference calls and largely held by insurance companies experience lower returns after the calls. The aggregate selling of insurance companies triggered by negative conference calls would spill over to private industry peers and lead to liquidity risk in the underlying corporate bond market.

4. Do Bond Short Sellers React to Earnings Conference Calls?

This paper examines how short sellers make use of the textual information in firms' earnings conference calls in trading corporate bonds. I find that short-sale activities increase for corporate bonds issued by firms with more negative earnings conference calls. The relation is not driven by looser short-sale constraints such as more lendable shares or lower lending fees. Bond short sellers are skilled at processing soft information in earnings conference calls, especially the default-related information. Bonds of firms with more negative conference calls are more likely to be downgraded or even default, and have lower returns in the future.
